

Fall 2026

CMPUT 301 Lab 1

Lab Outline

- Lab Days, Time, and Location
- TAs
- What NOT to Expect
- What to Expect

Lab Days, Time, and Location

- Days: Tuesday, Wednesday, and Thursday
 - Please show up to *your* lab section!
- Time: 5 – 7:50 pm
- Location: ETLC E1-003

TAs

- *list of TAs*

TAs

- One TA leading lab
- Other TAs on stand by
 - Raise your hand/go to a TA to get help

What NOT to Expect

- This is not a programming course
 - We will NOT explicitly teach you how to code in Kotlin
- Your teammates will NOT do your work for you

What to Expect

- First 8 labs
 - Complete pre-lab BEFORE your lab
 - Follow lead TA lab demo (slides and walkthrough)
 - Complete AND SUBMIT lab participation exercise
 - Submit *properly* before the deadline, no exceptions
 - For example: read the instructions carefully, follow naming conventions specified, and submit GitHub link to your public repo on Canvas as required
 - Tip: Submit your GitHub link on Canvas as soon as your repo is created, so you do not miss the submission deadline

What to Expect

Lab topics

- 1) Android Studio, Kotlin, and OOP (Labs 1 - 3)
- 2) Git (Lab 4)
- 3) Firestore Database (Lab 5)
- 4) Testing (Lab 6 - 8)

What to Expect

- When the group projects start
 - You will have scrums with your team and assigned mentor TA in lab, in person
 - Once lab 8 is done, there will be no more TA lab demos, however...
 - To *get the lab participation mark for the remaining labs*, you **MUST** show up for your scrum meeting

What to Expect

- Group projects
 - You must form a group of 6 with people in the SAME lab section
 - Highly recommended to start forming teams earlier!
 - After project parts 2 – 4, there will be *peer review forms* to evaluate your teammates
 - Note: There will be a group activity deliverable for Lab 4 that counts for lab participation

Any Questions?
